

Mobility Zone

U-Step 2 Walker

Standard Model

US-PC2

..... was designed to increase independence and eliminate falling among those with neurological conditions. The leading-edge features of the Li-Step 2, as compared to other walking aids, make it superior by providing more stability, maneuverability and control. Tens of thousands of people with neurological conditions have benefited from the Li-Step 2 design.

Regularly prescribed by physicians and physical and occupational therapists from leading hospitals and rehabilitation centers, and covered by most major insurances and Medicare, the U-Step 2 has been tested and proven to be beneficial for patients with various neurological conditions, including:

- Parkinson Disease
- Multiple Sclerosis
- Balance Disorders
- Brain Injuries
- ALS
- PSP/MSA
- Ataxia
- Stroke
